

# Message from the President

## Milford Amateur Radio Club

It is hard to imagine February is already upon us. We only have four months until hamfest and field day. If you can volunteer, your help will be greatly appreciated with either event. Obviously, the more who volunteer to help, the less effort is required of just a few. I will solicit help for both events at the next meeting. Please consider helping with whatever assistance you can provide.

I plan on using social media in the coming months to leverage our reach to increase attendance. If you have not already, please visit our Facebook page and click on the going button for the 2020 hamfest. Both vendors and attendees are more likely to attend if there is a lot of interest.

The club now has its UHF Fusion repeater up and running. It is operating on 443.450 MHz in both analog and C4FM modes. I wish to thank Chuck (K8CR) for donating the equipment rack for the repeater. I also wish to thank Randy (WB8RNV), John (AD8DM), James Watts, and Dave (K8DV) for their hard work in getting the repeater on-the-air! The C4FM capabilities should add excitement potentially attracting new members by being one of the more prominent UHF repeaters in the area.

The coming months should be very exciting for the club.
